GYNECARE is committed to helping physicians deliver new gynecologic treatment options that are both highly effective and less invasive than many existing therapies. Our commitment goes far beyond nurturing the latest advancements in medical technology . . . we also promote these minimally invasive choices with ongoing awareness and education initiatives for both physician and patient.

By leveraging the latest advances in medical technology, GYNECARE will strive to meet its mandate to provide the OB/GYN community with new diagnostic and therapeutic choices, and women with choices that enrich their lives.

This web site will provide information about our products to help guide you through these choices. As we bring new healthcare solutions to market, you will be kept abreast with ongoing updates to this web site.

To learn more about our medical and surgical devices or the related gynecological health problem, click on one of the links below:

- Adhesion prevention
  - GYNECARE INTERCEED (TC7) Absorbable Adhesion Barrier
- Incontinence
  - GYNECARE TVT Tension-Free Support for Incontinence
- Global Endometrial Ablation
  - GYNECARE THERMACHOICE Uterine Balloon Therapy
- Hysteroscopy
  - GYNECARE VERSASCOPE Hyteroscopy System
  - GYNECARE VERISTAT Fluid Management System
- Minimally Invasive Surgery
  - GYNECARE X-TRACT Tissue Morcellator

GYNECARE is also developing healthcare solutions in the areas of reproductive cancer diagnostics, fertility management, and endometriosis detection and treatment.
